The **Personal Genome Learning Center** is recruiting student participants for public outreach events focused on navigating, interpreting and using results provided by DTC genetic testing companies such as 23andMe and AncestryDNA.

Through participation in the Personal Genome Learning Center, you will gain experience interpreting and using the results provided by DTC genetic tests. Your engagement with your own results, coupled with an understanding of the underlying genetic principles and methods, will enable you to help others understand their results.

DTC test kits will be available at no cost to participants in the Personal Genome Learning Center. Participants will be expected to build understanding of the results provided by these tests and their uses through weekly meetings and engagement with your own results.

**Fall 2018 Weekly Group Meetings:**
Wednesdays, 5:30-6:30 pm, B20 BB

**Monthly Community Meetings:**
DNA Interest Group – Iowa City
4th Tuesday of each month, 6:00-7:00 pm
Room A of the Iowa City Public Library
