

Version 4.3

[<-- Version 4.2](#) | [Version 5.0 -->](#)

Create Task Lists in Pages

A new task list icon in the editor toolbar lets you create new task lists – perfect for meeting action items, release checklists, and project plans.

Assign Tasks to Co-workers

You can assign tasks to other users by @mentioning them in-line. Assigning a task triggers a notification and adds the task to the user's personal task list.

Manage Personal Tasks

Create new and track all your personal tasks and tasks assigned to you by others, in one place. Add notes and re-order with drag-and-drop to plan the day ahead.

View Important Notifications

You can now view all your important notifications in one place. Shares, @mentions, assigned tasks, replies-to and likes of your content – they're all a single click away.

Take Immediate Action

Reply to and like others' content and comments without leaving your notifications.

Turn Notifications into Tasks

Create personal tasks from notifications in one-click so you can follow-up later and focus on the task at hand.

For iPhone and iPad

Next time you visit Confluence from your iOS device you'll find a sleek new, super-responsive mobile interface to help you stay-in-touch wherever you go.

View, Comment, Like, and Search

Browse popular content, keep abreast of recent blog posts, and track your network's activity. Contribute on-the-go with quick comments and likes. Access pages, blog posts, and people from anywhere with quick search.

Track Notifications and Tasks

Now you can be productive from anywhere with quick access to your important notifications and personal tasks – it's all in your pocket.
